NEW! DETROIT WEBSITE

www.detroitiia.org

How much time have you spent searching through the IIA’s website looking for the Detroit Chapter’s webpage? Too much time?

Until recently, if you were unfamiliar with the site, it most likely took several minutes to perform the following actions:

1. Log into the IIA’s website;
2. Click on the “Chapters & Institutes” tab;
3. Select “Find Your Local IIA;”
4. Scroll through the listing of US States looking for Michigan;
5. Locate the Detroit webpage link.

Do you remember how long it took you the first time you ever visited the site? Well, now you can spend those minutes you would have dedicated towards navigating through the IIA website doing something you enjoy! The NEW IIA Detroit Chapter website can be reached at a moment’s notice and places relevant Chapter information at your fingertips!

Our previous Chapter webpage consisted of a standard template hosted by the Institute of Internal Auditors that was provided for each of the Chapters. The website allowed the Detroit Chapter to highlight specific event information and post communications from the president and officers. However, when trying to optimize the website’s potential of serving as a communication tool, it lacked the flexibility needed to provide the requested features. As a result, our Chapter leaders called the best person for the job: Bob McCall.

Bob McCall first became a member of the IIA by joining the Philadelphia Chapter in 1990. In 1994, his membership was redirected to the Dallas Chapter and in 2000 he joined the Florida West Coast (Tampa Bay) Chapter; this year he serves as President of the Tampa Bay Chapter. In 1998, while Bob served as a member of the IIA Dallas Chapter, the 57th International Conference was held and its organizers created a website for the event outside of the IIA’s domain. Once the conference ended, Dallas gained permission to continue using the website as its own. However, the website features required attention from someone with extensive web knowledge. As an IT Auditor, Bob decided to take up web coding as a “self-taught” hobby in order to fulfill the role needed to maintain the new website. From 1998-2005, Bob experimented with a number of templates and eventually created the resourceful website that Dallas uses today. What does the Dallas Chapter website look like? A lot like ours does now at www.detroitiia.org!

Due to the success and resourcefulness of the Dallas Chapter website, our Detroit leaders contacted Bob for assistance with creating a similar communication tool for our Detroit members. With approval from the Dallas Chapter, Bob was able to recreate the Chapter’s website template and tailor it to the specific needs of Detroit. As a result, please note that steps 1 through 5 listed earlier will no longer direct you to the most up-to-date Detroit Chapter information. In order to learn the date of our next meeting or read the latest Chapter communications, the following steps will need to be taken:

1. Go to the following web address: www.detroitiia.org

continued on page 2...
Our chapter year jumped out of the blocks to a great start last month! More than 200 people attended our first chapter meeting on September 10 (see article on page 6) and our timely topic and speakers helped lead to coverage of our meeting in the September 15, 2008 issue of Crain’s Detroit Business. I’d like to thank all of our volunteers for helping to make the first meeting as smooth as possible, but also want to thank the many members who took the time to provide us valuable feedback on our performance—everything from the name badges, to the speakers, venue, and registration. We take this feedback very seriously and I ask that you please keep it coming!

In the past month we’ve made progress on a number of our strategic initiatives. Specifically, we have achieved the following:

- **Chapter Website.** Recognizing the difficulty of navigating through the IIA website to locate the Detroit Chapter’s website, we obtained our own domain name this past summer and, last month, completed the migration of our chapter website to www.detroitiia.org. The new website allows members and non-members easy access to information about the chapter, our schedule of upcoming events (meetings, seminars and socials), and direct links to meeting registration, news, meeting materials and other information. The website was modeled after the Dallas and Tampa Bay websites and was made possible by the efforts of our webmaster, Kevin Gates, and Bob McCall, the webmaster for the Dallas and Tampa Bay chapters.

- **Chief Audit Executives.** We have begun the process of identifying and reaching out to a number of CAE’s in our footprint and have obtained very positive feedback regarding our plans to solicit their ideas for how our chapter can best serve the membership. More information on these efforts will be communicated later this year.

- **Programming.** We have tripled the number of joint meetings this year, capitalizing on our experience working with ISACA. Our October meeting is being hosted in concert with the Association of Certified Fraud Examiners and our January meeting is being held jointly with the Institute of Management Accountants. Similarly, we have a joint marketing arrangement, coupled with discounted admission for IIA members, at SecureWorld Expo in Detroit on November 5 and 6.

The changes we are making to position the chapter for future success are not easy and there will certainly be some hiccups along the way. I’d like to thank each of you, our members, for your support and patience as we deal with our growing pains and changes. I encourage you to pass along your comments, ideas and suggestions and engage with us on our efforts to build the chapter of the future.

Respectfully submitted,

Mark H. Weintraub
President

The new website allows our members to quickly obtain the detailed Chapter information they are looking for without wasting time or energy.

Going forward, Kevin Gates, IT Audit Manager for GMAC will serve as the Chapter’s webmaster and can be reached at webmaster@detroitiia.org if members need assistance with the website or care to provide constructive feedback. When asked about the advantages the new website provides, Kevin responded, “now that we have our own web host, we should not feel restricted in having to conform to a specific template. The ease of uploading new pages will help us create a site unique to Detroit that contains relevant information and is easy for each member to use. A lot was missing from our last website; however, I believe the new website will add value to our membership.”

In order to optimize its potential of serving as a resource tool, please take some time to visit Detroit’s new website and provide suggestions as appropriate... how long does it take you now to enter the site?
Doug Anderson: Well, our internal audit function consists of a team of 70 individuals who are based out of (1) Midland, Michigan; (2) Sao Paulo, Brazil; (3) Drusenheim, France; and (4) Shanghai, China. In addition to providing guidance to the Internal Audit team, I am responsible for overseeing the actions of our Fraud Investigative Services group and a Contract Compliance audit team which is specifically concerned with performing cost recovery contract reviews.

MR: What have you found to be the most challenging aspect of your role?

Anderson: Staying on top of risk profiles. It is key that we deploy adequate resources to the highest risk areas in time to stay ahead of the curve. We do not want to be reactive. In such a diverse company, it is a challenge to consistently perform preventative assessments as the risk profiles of the business units change with the company’s demands.

MR: What would you consider to be most rewarding?

Anderson: Well, it can be hard to measure the success of an audit team in our line of work. Audit achievements do not normally make the financial statements or newspaper headlines: “Audit Prevents Problems!” However, the feedback provided by executives stating that our team executed an engagement with a sense of professionalism and insight is very rewarding. Such comments from management will give me confidence that our team is doing a great job and adding value to the company.

MR: In your perspective, where do you see the internal audit function in ten years? Do you predict any new types of challenges?

Anderson: I do not predict Internal Audit’s fundamental challenges of resource limitations and goal of remaining objective and independent to change within the next ten years. I also cannot predict the next Sarbanes-Oxley! However, I think we will be using more advanced data analytics in our assessments that will allow us to use large data files more efficiently and perform higher quality reviews. In addition, future technology advances will create new risks for us to consider in our risk profiles; for example, the risk of intellectual property leakage is becoming a significant concern. Specific to Dow, advances will create new risks for us to consider in our risk profiles; for example, the risk of intellectual property leakage is becoming a significant concern. Specific to Dow, advances will create new risks for us to consider in our risk profiles; for example, the risk of intellectual property leakage is becoming a significant concern. Specific to Dow, advances will create new risks for us to consider in our risk profiles; for example, the risk of intellectual property leakage is becoming a significant concern.

MR: Have any experiences left a lasting impression on you and impacted the way you carry out your responsibilities today?

Anderson: Yes. In fact there are two incidents: First, we disclosed in February 2007 a settlement with the SEC of a bribery matter. One of our fraud investigations identified actions of bribery executed by one of our subsidiaries in India. Such actions were in violation with the Foreign Corrupt Practices Act and had huge implications associated with it. The risk of bribery taking place is considered to be of a “low likelihood” but to have a “high impact.” It is very easy to identify and assess risks considered to have a “high...
INTERNAL AUDIT INSIGHT: DOUG ANDERSON
...continued

a “high impact.” It is very easy to identify and assess risks considered to have a “high likelihood” and “low impact;” however, risks of low likelihoods are often not thoroughly investigated through in-depth analyses. As we learned in February, such risks need to be assessed and reviewed appropriately because the impact hits hard.

The second incident relates to a similar topic. In April 2007, it was discovered that a very senior executive and one of our Board members had been secretly discussing and plotting to buy out the company without management or the Board. I had originally thought that the likelihood for such an event to occur was mostly reserved for the movies! Once again, we had a situation considered to be very unlikely that almost cost us the company.

In both of these situations, I had to step back and think: How did we get here? Were there signs? Could we have caught this earlier? After such experiences, the importance of assessing risks with low likelihoods / high impact as well as thoroughly assessing the “tone at the top” within each control environment is well learned.

**MR:** Each audit team plans its engagements according to the uniqueness of its products, processes, etc. As Dow has a significant global presence, do you and your audit team find more value in planning audits that concentrate on processes at a specific location or do you review one process across all global units?

**Anderson:** We audit based on how management manages. For example, our operations in the Netherlands and India involve management controls for country-wide processes. We assess the risks of specific areas based on risk profiles in order to adequately evaluate the uniqueness of the risks associated within the different areas. However, with that being said, if we could audit everything across its global process, we would because it would be most efficient. Our risk profiles help us determine the best audit approach.

**MR:** Now that you have provided us with some insight from your audit experiences, I was hoping you would allow us to ask a few personal questions in order to get to know you as a person a little better. Therefore, knowing that you have had numerous international experiences, if you could request any type of meal for dinner, what would you ask to see on your plate?

**Anderson:** Oh, geez. Well… there is one specialty dish that I have only had once that I would certainly enjoy having again and that would be Blackened Sri Lankan Crab. I had it while in Singapore; the crab was HUGE and very good!

**MR:** Finally, I wanted to ask you about your experience on the University of Michigan’s Marching Band. What instrument did you play? Do you still play?

**Anderson:** I played the alto sax. Unfortunately, I have not been able to pick it up and play for awhile now. I have every good intention to do so but time never seems to allow for it. Were you ever in band?

**MR:** Yes, I played the clarinet for many years, however, the university I attended had an all brass marching band so I never marched in college.

**Anderson:** I have heard pros and cons to both arguments regarding whether or not woodwinds benefit a marching band because they can be difficult to hear. However, it is definitely noticeable how much rounder and warmer the sound is when woodwinds are included… listen for it next football game.

Thank you, Doug, for sharing with us your experiences and internal audit perspective. Detroit Chapter Members, if you would like specific questions addressed in future interviews or would like to nominate an individual to be featured in one of our monthly publications, please send an e-mail to newsletter@detroitiia.org.
### UPCOMING IIA EVENTS:

- **Achieving and Maintaining Internal Audit Process Excellence**  
  October 13: Denver, Colorado  
  December 9: Orlando, Florida

- **Emerging Client Expectations and Internal Audit Roles**  
  October 14: Denver, Colorado  
  December 8: Orlando, Florida

- **All Star Conference**  
  October 20-22: Las Vegas, Nevada

- **Central Regional Conference**  
  November 2-5: Columbus, Ohio

Event details as well as the 2008 and 2009 schedule of IIA sponsored seminars can be viewed on the IIA website: [http://www.theiia.org/iaa-training/](http://www.theiia.org/iaa-training/)

*IA Members, use code DETIIA8 to receive price discounts!*

---

**NOVEMBER DETROIT CHAPTER MEETING -**  
**Tuesday, November 11, 4:00 – 7:30 PM**

The topic of discussion for the November Chapter Meeting will include “Offshoring – The Future Footprint & Audit Implications.” The meeting will be held at the VisTaTech Conference Center in Livonia. Registration details* will be communicated at a later date.

*Cost for Chapter Meetings: $40 Members; $45 Non-Members; $20 Retirees; $20 Students. $5 fee will be applied if paying at the door

---

An Annual Calendar of Chapter Events can be viewed at the following website: [http://www.detroitiia.org/Events.htm#MTG](http://www.detroitiia.org/Events.htm#MTG)

Our Chapter has been kind enough to sponsor 11 graduate Masters of Accounting, Masters of Taxation, and MBA students from Wayne State University at the next Detroit Chapter Meeting on October 14th. The students attend an Internal Auditing course taught by IIA Member Mark Savitskie on Tuesday nights. The Detroit Chapter is proud to support the students by providing an opportunity for them to interact with the driven and knowledgeable professionals that comprise our Chapter.
**Did you know...**

**Our Chapter earns CAP points for members who publish an internal auditing article in an IIA publication?**

Each article submitted to the IIA for the *Internal Auditor Magazine* meeting basic editorial guidelines earns the Chapter 5 credit points; each full article published in the magazine earns 20 credits. In addition, 5 credits are earned for each article published within any other IIA publication.

**The Detroit Chapter can earn CAP points for members who serve as guest speakers in secondary school classrooms?**

1 credit point is earned for each 50 minute speaking period performed by our members.

**CAP points are earned for each member’s speaking engagement on internal auditing?**

The Chapter earns 1 credit per each CPE hour for which our members are the speaker.

---

**Did you know...**

Our Chapter receives CAP points for interns employed by companies in our area.

**Did your company employ any audit interns this summer?**

Yes? You may have helped the Chapter obtain CAP points! Please let us know by sending information on internships to Martin.Wood@flintgrp.com

---

**MEETING MINUTES: SEPTEMBER 9, 2008**

With a total of 211 attendees, IIA members and non-members, the IIA Detroit Chapter kicked off the 2008/2009 program year with an exhilarating meeting on September 9th that addressed headline topics of significant interest lately: “The Credit Crisis and The Economy.”

The evening’s discussion began once President Mark Weintraub welcomed Robert Van Order, Former Chief International Economist for Freddie Mac to the front of the room. Mr. Van Order addressed the current acquisition of Fannie Mae and Freddie Mac by the government as well as the market trends and loan attributes that have led us to today’s current market conditions. David Littmann, Senior Economist with Mackinaw Center for Public Policy then directed the conversation to Michigan. Mr. Littmann provided insight on Michigan’s economy and noted that the number of individuals working government positions within Michigan exceeds the number of Michiganders hired by companies in the private sector.

Mr. Van Order’s handout slides, “Mortgage, Markets And What We Know So Far,” can be viewed on the Chapter’s website or by clicking on the following link: September Meeting Handout.

---

**Total Points Earned as of September 2008 . . . . 274**

**Point Total in September 2007 . . . 258**

**CAP Achievement Levels:**
- **BRONZE** ............... 685
- **SILVER** ................ 1060
- **GOLD/PLATINUM** ...... 1560

**Detroit’s 2007/2008 Point Total ............ 2068**

---

*Left to Right: Presenter David Littmann, Senior Economist with Mackinaw Center for Public Policy; Pam Bishop, IIA Detroit Chapter Programs Committee Chair; Robert Van Order, Former Chief International Economist for Freddie Mac.*
The UNIVERSITY OF MICHIGAN University Audits Office is seeking qualified candidates for the position of Senior Internal Auditor-Healthcare to perform complex audit work including planning, risk assessment, internal control analysis, documentation, and reports. This position will conduct process, operational, and compliance audits and special projects related to the University of Michigan campuses with emphasis on the Health System.
